

ABSTRACT

A system for facilitating training of a tire pressure monitoring system on a vehicle by providing an indication to the exterior of the vehicle. The system includes a receiver circuit configured to detect a wireless message including a tire sensor identifier, a memory configured to receive and store a number of tire sensor identifiers, at least one external indicator on the vehicle configured to provide an indication to the exterior of the vehicle, and a control circuit configured to provide a control signal to the external indicator on the vehicle to indicate to a user to actuate a tire sensor transmitter.
